The End of Data Silos: How Lakehouse + Lakebase Are Redefining the Enterprise Data Stack

Aishwarya Menon

Data Engineer | SQL | PySpark | Databricks | Azure | AWS | dbt | Airflow | Building Scalable ETL Pipelines & Cloud Data Solutions
Richardson, Texas, United States

Summary

I'm a Data Engineer who loves transforming raw, messy data into reliable, scalable, and insight-ready systems that drive real business impact. I specialize in building ETL/ELT pipelines, data modeling, and cloud-based data architectures using Azure, Databricks, and PySpark — helping organizations unlock the full potential of their data.

At Indrasol, I design and maintain Delta Lake architectures and PySpark pipelines that streamline enterprise analytics, improving query performance by 25% and ensuring high-quality, consistent data delivery across multiple sources. I collaborate closely with analysts and engineers to build data models and CI/CD pipelines using dbt, Airflow, and Azure DevOps, ensuring reliable, production-grade data operations.

In my previous role with a healthcare analytics firm, I engineered end-to-end data pipelines for clinical and claims data, integrating over 15 TB of structured and unstructured data into Azure Data Lake and Synapse. I reduced data load times by more than 50%, improved accuracy to 98%, and built frameworks that supported predictive modeling and population health analytics at scale.

I'm passionate about connecting engineering and analytics — creating data platforms that don't just move data, but make it meaningful, trustworthy, and actionable.

Core Skills & Tools:

SQL | Python | PySpark | Databricks | dbt | Airflow | Azure Data Factory | Azure Synapse | Snowflake | Data Modeling | ETL/ELT | Data Quality | Delta Lake | Power BI | Data Governance | CI/CD | Cloud Data Architecture

Experience

Indrasol

Data Engineer

January 2025 - Present (1 year 2 months)

Education

The University of Texas at Dallas

Master's degree, Computer Science · (August 2023 - March 2025)

R.M.D ENGINEERING COLLEGE

Bachelor of Engineering - BE, Computer Science · (September 2018 - May 2022)
